

Flashcard Deck Maker

Overview

This project is an app that:

- Creates flashcard decks
- Allows you to quiz yourself
- Allows you to share decks with others

- Total individual Lines of Code (LoC): ~1700
- Number of individual features completed: 7
- Number of individual requirements completed: 8
- Individual burndown rate (%): 100%

What Went Wrong

- Basic file structure needed a rework
- Some features were a little troublesome
- Time management
- Deviated from the original task order

What Went Well

- Features became easier to implement as time went on
- Testing was very satisfying
- Fun to mess around with

Analysis & Improvement Plan

- Overall, I aim to fix time management issues
- The scope of this project is not as wide as one might expect, but there is more that can be done
- Plan to make this into a deck-sharing platform like Quizlet

Sprint 1 Schedule

- Week 1: Card/Deck Functionality
- Week 2: Scoring/Searching system
- Week 3: Authorization
- Week 4: Final touches

Sprint 2 Goals:

- Implement a DB system for more optimal storing/sharing
- Implement an online deck sharing system
- Allow the user to choose a random deck
